Vol. 1. No. 1 Joshua Tree, California September 1953

## THE PURPOSE AND POLICY OF THIS MAGAZINE

By the Editor

The Interplanetary News is the only magazine in this world devoted entirely to promotion and introduction of Friendly Relationships between us, the Earth People and our much more advanced Space and Cosmic Friends. These beings enjoy a greater concept of God then we do and as such, they deserve our attention and respect.

The purpose and policy of this magazine is to wipe out fear and imbue courage and daring into the hearts and minds of our people to receive the Truth. And this, through the awakening of the Christ Within all of us, so, as to be able to meet beings from other portions of God's Universal Body. This, for bettering ourselves and advancing onward in God's Expression of Himself in us.

We must take the Initiative ourselves. These beings from outer space are our friends and though invisible to most people here, they are helping us everywhere. Destiny beckons and we must answer now!

Here is an invitation to a New Life more abundant then ever before. And this through the Christ in you and me and our Space Ship Friends.

So, I am asking you to show every possible consideration for their comfort and welcome when they land on our earth, they, being by far more superior children of the same God.

The Cosmic and Spiritual schedule must go on. We are entering the Higher Consciousness and Awareness Sphere. Our Cosmic Friends are offering to aid us in every way to a better understanding of the Power of God's Light.

For God is everything that man is and man is everything that God Is! So, perhaps soon, we can understand what Jesus meant when He said, "These things ye shall do and even greater things then these shall ye do". Our Friends from other portions and sections of God's Universe are here to assist us in the Revelation of a Greater Concept of His Truth, like unto God Himself, so, that we too, can be FREE!

## GOD'S "WORD" FROM OUT OF THE GOLDEN MIST

(Received through George Van Tassel, Former Flight test Engineer)

Sunday June 28, 1953

O mortal infant, clothed within the womb of flesh, I shall bring about the birth of those whose righteousness has been demonstrated in the Love of Me. Though my Presence has been placed beyond the realms of death, as called by those who lead my multitudes in ignorance. Let not a moment's worry rest within the heart that I have abandoned a single one. For each seed shall ripen in its time, and I shall bear the patience of Eternal waiting. For my continual action is manifested in beginnings that never end. And though my parts are set asunder, to experience repetition, none shall lose the Infinite Everlasting right to my Being with them, incased Within.

### Editor's Note:

I was present at this Interplanetary and Cosmic Communications period, when this timely and urgent message came from the "Within" of George Van Tassel at Giant Rock.

## INFINITE LIGHT POWER

For an objective point of view, assume that the "G" line of force is vertical to the plane of this paper. We indentify this force by calling it "G".

Assume that the "A" line, is on the paper running crosswise. At 90 degrees to the vertical "G" line. This "A" line of force is composed of positive charged particles. We shall call this line "A".

Assume that the "B" line is running from the top to the bottom of this paper, at 90 degrees to the "A" line and 90 degrees to the "G" line. This "B" line of force is composed of negative charged particles, which we shall call "B".

Where these lines of force cross there is an atom, a micro solar system, created by these unseen forces in perfection. This atom element is determined by what substances are present in the charged "A" particles and "B" particles. This evolves a nucleus of positive charged particles we shall call a proton, surrounded by a field of negative orbit set up by the "B" particles in motion. In this orbit are concentrated a group of "B" particles we shall call an electron.

The line of pure light energy "G" has no motion as to direction. It does have an extremely high rate of vibration. It is invisible to the physical eye. It extends infinitely through-out all space, through all substances and materials. It exists in what we term both light and darkness. These lines of force are parallel. It is the force that parallels poles in planets and the portion of light force that we call polarized magnetism. This polarity cannot be established in "G" light without motion of flux set up by "A" and "B" particles.

Atoms compose all things. "G" light energy composes all atoms. "G" light is the creative force of the creative intelligence. Until science excepts the cause force of creative light in unseen intelligence there will continue to be constant change in their theories, due to the retrograde procedure of taking things apart instead of putting them together.

Some scientists are constructive, but science as a whole is bending it's efforts toward destructive methods and instruments. Like the man who became so frightened looking down, out of a window in a high building, in fear of falling out, he backed up so far that he fell out of a window on the other side. The end result was the same. People are reaching a point of outlook, in this atom experimentation age, where the old fear of death is becoming a fear of living.

Our earth is an electron of our sun, traveling in it's orbit of negative field. Rotated by the band width of "A" and "B" light forces equal to the earth's diameter. Bringing about the lines of force establishing what we call rotation, magnetism, polarity, gravity, electricity etc. All the same thing, taken apart by science even as truth has been taken apart by churchanity, making all things more complex, easier to hide behind by the power trusts of destruction, less understandable to the multitudes who can only see a few pieces.

The flying saucer beings use this light force for all purposes. The transmutation of matter, space travel, heat, cold, food, communication, transportation and many things we know nothing about.

Their Federation of Planets and Space Stations, use no money, have no disease, no class restrictions and understand peace. All beings in their system are equal. There are no poor or rich, no injustice, no persecution or selfishness, no wars, no

profits, no boundaries or hatreds, no propaganda, no fear, no churches. They live by the Infinite Law of the Creator, and are privileged to use His Laws in wisdom.

We on this earth can have all these things the saucer beings possess, if we discontinue destruction as our basis of living. Discard atomic experiments or be destroyed by them. The cost of World War Two, if spent in constructive channels would have brought about a golden age.

Now the saucer beings offer us the knowledge, to bring about a new age. Are we the people going to accept their offer, or permit a selfish few, power mad authorities, to withhold our birthright to true peace and freedom from us?

You are one of the Creator's agents of love, if you work and think, to help bring this condition into reality.

(The above are Excerpts from the Book "The Council of Seven Lights" by George W. Van Tassel)

Friday June 26, 1953  
(As Received through George Van Tassel)

My Light, I am Morko. It would be difficult for you to realize the tremendous activity taking place in the unseen realms of this planet. It has been necessary for the Council of the Seven Lights to move the globe of Shanchea (globe circling the earth) in order to avoid vortices of force sent up by your nuclear explosions. The atmosphere of your planet is contained within numerous levels of positive and negative charged particles. The effort being extended now is to plug the holes in your atmosphere created by these numerous explosions, unfortunately, the suction force has drawn into your breathable air many substances from these other levels that will result in new and strange illnesses among your people.

Editor's Note:

Here, we are given insight as to what is really happening as the nuclear explosions are being tested. Here also, we are given to see how our invisible Cosmic Friends are protecting us from destroying ourselves and those about us in Space. Here is Love in Action.

There is but one answer and that is, We must become Aware of the Christ Within each individual. Each individual must be born again of the Spirit and let the Christ Within live in this life now. The Christ-Consciousness Within will make it possible for us to comprehend direct Truth with our Conscious mind now. Only in this way can we become expendable in consciousness and love to include millions of beings in other planets, stars, suns and moons in other portions of God's Cosmic Body.

FROM THE COUNCIL OF THE TWELVE LORDS OF UNI

(Received through George Van Tassel)  
Sunday June 28, 1953

Blessings, blessings my very wonderful sisters and brothers in the physical density. I extend to you the Light and Power from the Council of the Twelve Lords. I am your brother Ah Ming. I am requested to extend to you the explanation of the symbol of the Circle in which the Cup is within the upper portion with an Open Hand and a Bolt of Lightning beneath. This is the figure of prayer. So, failing to bring about results for the people of this planet because the spoken word is not extended within the Law of His Infinite Wisdom. The Circle always symbolizes the Encloser of all that is. The Cup is the vessel of humility and supplication. The Open Hand is the symbolized expression of need or want, necessity, and the Bolt of Lightning is the charge of force projected to bring about a result. So, when you Mortals, my physical brothers and sisters, extend yourselves in prayer, do not mumble

with head bowed in downward glance. Look to the Infinite stars and place yourself within the first Law of Expression in humility and supplication to your Infinite Father. And secondly express the need the essential necessity of bringing about the content of your prayer expressed. And thirdly, demand as your right, represented by the Bolt of Light, your right as a Son of the Creator that this need expressed in humility be brought about by your demand that it shall be fulfilled in His Light, through you for any condition. Mumbled words are of no avail. Put the force, put the energy and the expression of your very being into each word. Express His Strength, not your weakness, my Everlasting Love, I am Ah Ming.

ALL THIS AND SPACE SHIPS TOO!

By the Editor

Humanity has harnessed and mastered physical matter with material science, created in the objective state or the negative idea of being. But now has come the time for man to return to the Inner Positive, the Divine Being of God within Man Himself.

Mankind has progressed steadily and in the last fifty years much more swiftly than ever before. Now, man is looking and pushing out into a new frontier--Space!

But it won't be a Space Ship now will it be a trip to the moon or interplanetary travel that will be man's greatest discovery or accomplishment.

For man's greatest discovery is right within--Himself! Thus far, man has missed and over-looked the most important frontier--Himself, the unexplored virgin territory, the Divine Inner Christ-Being, patiently waiting to be discovered by man, himself.

All through the long dark struggle and restrictions of physical matter during the period of grasping for material possessions in this outer world, man hasn't had time, nor has he cared and so, tragically his Inner Christ-Self has not yet arisen into activity in the tomb of the physical body.

But now, man is on the verge of the most exciting adventure ever to happen to him in his physical existence on this earth: And that is the discovery of his Christ-Self in himself. Not long ago, man discovered gold in the earth, but when he uncovers the Christ within himself that will revolutionize his life here on earth. This will even change the earth itself.

This Christ of God in man will conquer with the Father's Divine Love the wild and untamed lower basic nature of man just as man has subdued physical matter in the outer world. Man has progressed in the outer world to the point of successfully guiding his inanimate mechanisms by materialistic scientific means but, when man becomes one with the Christ within himself and learns the scientific means of the Spirit, then we will witness true progression.

Only through the Christ in Himself can man discover the Truth. This has been made easy for us by Jesus the Christ, the greatest Engineer of human progression ever to have visited this world. He created the perfect pattern which anyone anywhere can follow in his own life and escape out of illusion into the "Real Universe".

Our space and cosmic friends are offering to help us live life more abundantly-- Just as Jesus promised. They have the understanding of the Christ Within.

And when we finally let the Christ in us live as one with the Father-and-Mother-God Consciousness, we will wonder why we were so long in making the greatest discovery

which was not far away but, right within the physical body.

Absolute Truth is God. God and Truth never Change. But our concept of God and Truth is ever changing. We grow in the understanding of It.

So, our Space Friends are arousing in us a greater Concept of God. They are exercising our intelligence, stirring our intuition and our soul-imagination into action. They are causing us to be more expendable in the mental and spiritual planes of life. They are hastening our discovery of the Christ within. There is but One Entity and that is God. We can find ourselves in Him if we welcome Him in us. And we must welcome His Beings from other parts of His Universal Body. They have expanded to greater and higher consciousness in God's Truth.

Now these Space and Cosmic Beings are an advanced expression of God's Creative-Consciousness and we must welcome them in the Love of that same Christ.

For it is God's Divine Love and that Love Alone, that will reveal the Truth to us and set us Free forever!

SAUCER STUFF AND SCOOPS by the EDITOR

Recently, there was the Brush Creek, California, Flying Saucer incident. In this the two miners showed a complete lack of courtesy or welcome to our little visitor from somewhere in space.

A little while later, from Atlanta, on July 9th, we read about the barber who shaved a dead monkey and tried to claim it to be a mysterious little man from another world.

On July 16th, our Air Force announced a powerful new flare for night photography on the B-26 bomber in operation for past two years. And it is true that this could have caused some Flying Saucer reports from the public. But this does not end the Saucer Mystery.

July 20th, the two titanium miners and many curious spectators, also, some who were going to shoot and capture the little visitors, were there waiting at same spot near Oroville, California, where twice before on May 20th and June 20th, the Space Visitors were supposed to have landed.

Shooting would not hurt our Space Visitors, it only shows our lack of intelligence. There is only one way to impress them and that is with Love.

The Indians had water visitors. The first sighters were doubted.

The world has Space Visitors. The first sighters are doubted.

An open mind, one way and the other, is height of intelligence.

Genevieve Johnston has unfolded into Universal Activity with such an latitude, yet is such a child at heart, that I accept her in full. She presents in this article proof of her elasticity, and radiates her Universe in all directions. Does not the Sun and all the Stars do the same?

Orfeo Mathew Angelucci
